Mobile dropdown behavior:

- <details> in .navbar-start, toggled by <summary> click
- handleCloseMenu() sets isOpen = false and removes the open attribute via mobileMenuElement ref
- NavigationMenu rendered with :hover="false" :border="false" textSize="text-lg"
- emitCloseMenu event bubbles up from DropdownMenu → NavigationMenu → Header to close panel after nav

NAVIGATION TREE — 4 top-level items | 2 with dropdown sub-links | 2 direct-navigate
